

Soft Flex

QUALITY CRAFT WIRE

Soft Flex® Craft Wire is the highest quality, permanently colored copper wire available. It is resistant to scratching and marring. This is due to the enameling process used to coat the wire to produce the wide spectrum of colors we offer. After the enamel is applied, the wire is then clear coated to prevent tarnishing. Bare Copper is the only wire in the line that is not treated. If antiques and old findings are your medium, Bare Copper will patina - perfect for making that new project look like an heirloom. Quality Soft Flex® Craft Wire is available in a variety of gauges, we currently offer six of the most commonly used sizes in the jewelry industry. A quality design idea deserves a quality craft wire. *Made in the USA* 🇺🇸

Colored Copper Craft Wire Gauges: 18 ga (1.024 mm), 20 ga (0.812 mm), 22 ga (0.644 mm), 24 ga (0.511 mm), 26 ga (0.405 mm), 28 ga (0.321 mm)

(All colors are available in bulk)
