Crimps & Pliers

CRIMP TUBES

Soft Flex® Crimp Tubes are crafted with the professional in mind.

We have constructed a crimp tube that is almost twice as thick as others on the market. The sturdier build of the crimp is enhanced by the fact that they are also seamless. Finish your next piece securely with our designer crimps. When used with the correct diameter of wire & crimping pliers, you are sure to have a solid design. *Made in the USA*
