Tools

SOFT FLEX® PRO TOOLS

Quality tools for a professional designer!

Treat yourself to cutters and pliers that will stand the test of time.

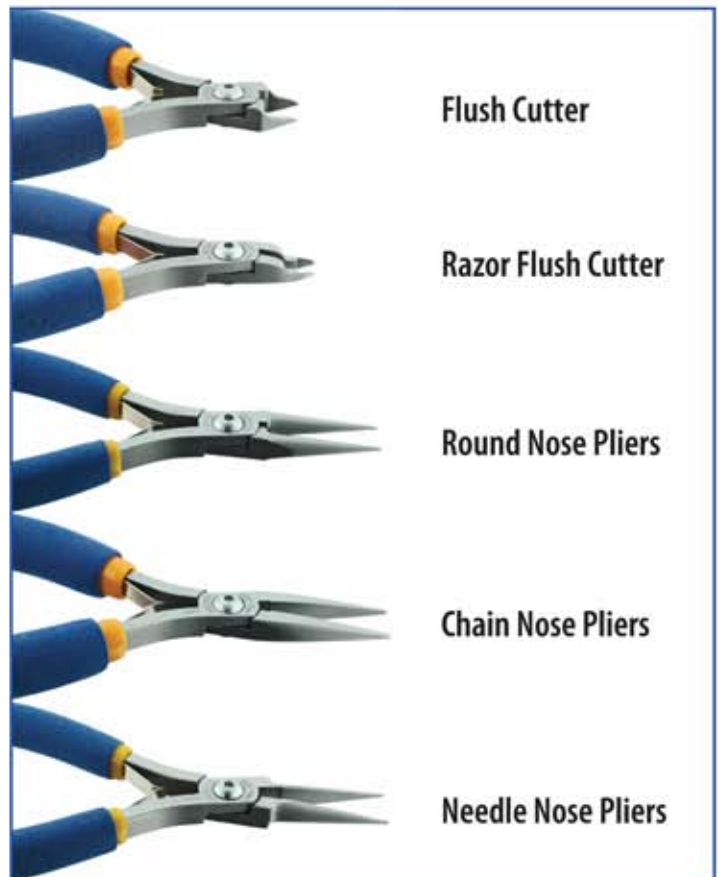

The Soft Flex® Company Tool Line features, as standard, a unique double-sheathed, ESD safe, cushioned grip. The inner sheath is a tough vinyl, ESD safe material which holds the leaf spring and the cushioned surface to the handle. The outer sheath, also ESD safe, provides a no-slip, cushioned surface for the operator's hand. This is important because the slight compressibility of the cushion aids to distribute the pressure more effectively. It can even absorb sharp particles which could be imbedded in the hand. The Soft Flex® Company Tool Line's cushion grip is almost always considered by operators to be more comfortable than the hard plastic used by competitors. *Made in the USA* 

Professional Tools
